Colin, when you have a moment, Francesco needs a statement on what you told me last right re: time stamps on the explorer being nearly 100% accurate minus connection latency

The Bomber   9:27:36 AM

ZS **Zack Shapiro** Wed

Hey B, I just talked to Colin. He said that time stamps on the explorer are accurate within a few seconds

There's a latency due to the internet connection but those time stamps are essentially 100% accurate

The Bomber   10:44:37 AM

@Zackshapiro @clemahieu it's urgent

ZS **Zack Shapiro**   10:56:48 AM

What are your questions or concerns when Colin gets on? Or do you just need him to type it?

The Bomber   10:58:12 AM

We are investigating on a problem but we need Colin

Colin LeMahieu   11:15:25 AM

Well it's similar to a "last accessed" timestamp. It's just stored
in the database, it should be fairly accurate unless it was
modified somehow.

we haven't recorded in our db — 11:24:03 AM

we can try to calculate the date but is very difficlt if explorer is incorrect — 11:24:30 AM

this is why I asked zack if it was accurate   edited 11:24:46 AM

Colin LeMahieu   11:25:32 AM
CL
I see. Well it can't be 100% correct because older transactions
are on the bottom and the date is later than the transactions
above it.

That's just a local date to the explorer machine though, it's not   11:25:43 AM
a guaruntee.

The Bomber   11:26:29 AM
we have suffered a stolen and did not know when this was

How do you recommend behaving as the stole only affects   11:27:21 AM
raiblocks?

Colin LeMahieu   11:27:26 AM
CL
It seems like if you have a record of withdrawls or deposits
before/after the transactions with bad timestamps, you could
figure out the date.

The Bomber   11:28:19 AM
We certainly can not rely on the explorer as was said

Colin LeMahieu   11:28:57 AM
CL
For instance if you have a record of a deposit for hash AAAA,
you see unknown transaction BBBB, and you have a record for a
deposity CCCC, you can know the date of BBBB is between
those two.

The Bomber   11:29:22 AM

> **Colin LeMahieu**
> For instance if you have a record of a deposit for hash AAA…

if not, we havent a date

So we know that there can be no certainty of the date on   11:29:48 AM

For one of the transactions before the problem, can you tell me a hash and date you have recorded internally for that transaction?

And then a hash/date according to withdrawal or deposit logs you keep for after also. — 12:59:10 PM

Let me know and we can look and maybe find a date.

Your transaction log date/hash for before and after, any transaction, doesn't need to be the same account. — 1:01:31 PM

Your time stamps or from the explorer site?

The Bomber — 1:06:14 PM

our timestamp

not from explorer — 1:06:17 PM

However it would be important for all us to collaborate in this situation — 1:12:07 PM

We need to understand how to announce the problem — 1:12:21 PM

The Bomber — 1:35:58 PM

Guys, are you going to cooperate or not?

we're having a team conversation

The Bomber   1:36:42 PM

If I have to go on my way, tell me

ok   1:36:43 PM

I repeat, if we can work together, better   1:37:06 PM

The Bomber   2:28:28 PM

let us think about it

The Bomber   2:37:17 PM

> **Zack Shapiro**
> let us think about it

One thing zack

We must report it to the police   2:37:26 PM

To avoid negligence   2:37:52 PM

Jere are 9:38 p.m. So we will going to police tomorrow on   2:38:26 PM
9.30a.m.

Zack Shapiro   2:38:37 PM

ZS

ok

The Bomber   2:38:53 PM

If we can find a solution will be better to find it before

We need to report to the police the solution too to avoid website 2:39:39 PM
shutdown by police

I do not know if I have explained the thing   2:40:24 PM

Zack Shapiro   2:41:35 PM

ZS

explained what thing

The Bomber   2:43:13 PM

> **Zack Shapiro**
> explained what thing

When i will come to police to report the stole, probably they
confiscate the server to be able to investigate

I think   2:43:20 PM

So, if you are able to get a solution for the stolen, better to

report to the police too   2:44:00 PM

If you dont understand, tell me i will try to repeat better   2:44:51 PM

Google translate dosent help   2:45:00 PM

Is there any possibility to fork the chain and get xrb from burned
address?

Seems the only solution for me right now   2:55:21 PM

The Bomber   3:33:55 PM

@Zackshapiro about users, do you think we should say it now? I
do not know how much else we could wait

Zack Shapiro   3:40:44 PM
ZS
Can we talk about this tomorrow?

The Bomber   3:43:05 PM

> **Zack Shapiro**

Hi guys

have you decided something?   1:01:14 AM

Zack Shapiro

ZS We're not making a statement with you. 1:05:31 AM

The Bomber 1:07:39 AM
ok, we have to do it

So, no solution from your part? 1:08:18 AM

@Zackshapiro @clemahieu 1:11:11 AM

We will say what happened. 1:16:06 AM

Due to an xrb bug that caused the node to crash, the attackers forced the system to get double payments for which we have no trace of time due to another bug in xrb official explorer.

We will say that the devs refuse to cooperate despite the proposed solutions.

We are going to report the incident to the police, first and then we will explain what happened 1:17:33 AM

Millions of dollars of your supporters depend on your decision. 1:18:52 AM

I hope you have understood this before making the decision not to cooperate 1:19:28 AM
